

Ecological Restoration (General) Manager Job Description

Overview

NCS is seeking an enthusiastic Ecologist/Restoration Manager with 5+ years of experience based out of Northville, MI. *The mission:* managing 10-20 projects at the same time, you will manage upland and wetland restorations, consulting with private and public clients, and administering woody invasive species management projects, overseeing the projects from the beginning to end, including managing staff, schedules, and technical direction, and project QA/QC. To thrive in this role, you need to possess excellent and timely communication skills, as you will be in constant contact with direct reports, contractors, staff, and clients, all speaking different "technical languages"; and friendly, relationship-building skills, as you will be a front face to stakeholders at NCS's project sites. Most importantly, we need someone with a passion for teamwork, efficiency, and devising step-wise ways to continually improve a growing ecological firm!

Schedule

75% of the time, you will be on the field, overseeing the projects you are assigned to, and managing the technical field team that includes restoration Supervisors, restoration Technicians, contractors and third party science consultants. You will oversee all aspects of project QA/QC.

25% of the time, you will be in the office, supporting the projects, through adequate staffing and budgeting, reviewing plans with designers, and ordering project materials and developing methods, submitting permits relevant to the projects, and updating projects in the system. You will also review project opportunities and develop with estimating proposal team/principal ecologist, and interact with clients, regulators, consultants and contractors - making sure their needs are met.

Qualifications

We would love to talk to you if you have many of the following:

- BA/BS Biology, Ecology, Environmental/Soil Science, Hydrology, Natural Resources/Ag. Science, or Landscape Architecture/Horticulture
- 5 Years' Experience in ecological restoration AND project management
- Knowledge of principles of environmental permitting
- Experience in construction oversight and compliance
- Experience and enthusiasm for training and leading ecological restoration field technicians

Compensation

- We offer competitive salary and benefits!
- Commensurate with experience
